

Automatic Sample-cutting Machine QY22

Product Attributes:

Product name	Automatic Sample-cutting Machine
Brand Name:	ASIDA
Model Number:	QY22
Place of Origin:	China
Packaging Details:	Wooden Carton

Automatic Sample-cutting Machine Use:

This machine is used in minor sample cutting when conducting metallographic analysis of production processes and fini-shed productions of copper clad laminate and rigid printed circuit board.

Automatic Sample-cutting Machine Features:

High-quality pneumatic components and accurate X-Y work table, which increases the accuracy of sample cutting.

Clear sample-cutting process, safe & reliable, no dust or noise.

Patented design, flexible programming, wide range of sample cutting.

Automatic Sample-cutting Machine Parameters:

ITEM	SPECIFICATION
model	QY22
samples cutting dimension	5×5×mm ~ 50×50mm
max width of available sample board	508mm
min dimension of available sample board	120×100mm
available sample board thickness	0.5 ~ 8mm
depth	280mm
milling cutter specification	Φ2.0 Φ2.4mm
